Vinh Hung Ward, Hanoi City

Education

Information Technology

2021 - 2025

University Technology and Management

Focused on software engineering, web development, and database management

Skills

Languages: Java, JavaScript, TypeScript, HTML5, CSS3.

Frameworks & Libraries: ReactJS, TailwindCSS, NodeJS, SpringBoot

Database: MySQL, SupaBase

Tools: Git & GitHub, Figma, Postman

Career Goals

Motivated Software Engineer seeking to develop strong expertise in software development and system design. In the short term, I aim to enhance my technical skills and contribute to high-quality software projects. In the long term, I aspire to become a skilled engineer capable of designing scalable systems and leading impactful technology solutions.

Work Experience

Intern - NinjaAI **Jun 2025 - Present**

Rocket Global Company

- Developed backend features using **Python / Node.js / Java**.
- Built and maintained **RESTful APIs** for internal services.
- Worked with **MySQL/PostgreSQL** for database design and data management.
- Collaborated with team members using **Git for version control**.
- Participated in **testing, debugging, and performance optimization** of applications.

Project

Position: Frontend - Rocket Global Company **Jun 2025 - Aug 2025**

Education System

- Developed a role-based educational platform, translating complex Figma designs into pixel-perfect, responsive React components for over 20+ screens.
- Implemented real-time notifications for course updates and assignments using WebSockets.
- Optimized frontend asset delivery, contributing to a 30% reduction in initial page load time.
- Integrated RESTful APIs using Axios and managed complex global application state with Redux Toolkit.
- Use ReactJS, TypeScript, Tailwind CSS, Redux Toolkit, WebSockets.

Position: Frontend - Rocket Global Company **Aug 2025 - Oct 2025**

CRM (Customer Relationship Management)

- Engineered core modules for a scalable Customer Relationship Management (CRM) dashboard, handling large datasets of user interactions.
- Integrated Chart.js to render interactive, high-performance data visualizations and dynamic reporting metrics.
- Developed robust, multi-step forms with advanced validation using React Hook Form and Zod, ensuring 100% data integrity.

Certificate

Nov 2024 Java Web Fullstack(VTI Academy)

Interest

Soccer

Watch Movies

Jogging

- Collaborated closely with backend engineers via Postman and Swagger to define API contracts in a daily Agile/Scrum environment.
- Use ReactJS, TypeScript, Tailwind CSS, Chart.js, React Hook Form, Zod.

Position: Frontend - Rocket Global Company **Oct 2025 - Dec 2025**

DMS (Distribution Management System)

- Developed features for a mobile Distribution Management System (DMS) application tailored for warehouse and inventory tracking.
- Implemented barcode scanning functionalities and real-time inventory updates for warehouse staff.
- Built intuitive and responsive mobile interfaces ensuring high usability in fast-paced warehouse environments.
- Optimized mobile app performance, handling offline data synchronization and seamless API integration.
- Use React Native, Expo, TypeScript, Redux, RESTful APIs.
